

Webinar

As COVID-19 continues to spread, countries and industries are in the fast-paced environment to develop vaccines. Scientists and researchers are engaged in developing the vaccine, countries are busy in preparing the supply chain to handle the high number of vaccines to deliver. **Delivering vaccines at scale is going to be the first experience for many countries and it requires partnerships with several stakeholders to mitigate the challenges.** In the pretext of our efforts to alleviate the larger impact of the outbreak and our readiness to deliver the vaccine at scale, the proposed webinar is an attempt to bring key stakeholders together to share their ideas and experiences for our preparedness to deliver at scale.

Session 1: Priority Setting and System Readiness to Deliver at Scale

Prof. Prashant Yadav
Lecturer, Harvard Medical School & Affiliate Professor INSEAD

Dr. Sanjay Kapur
Managing Director, JSI, India
